*Where theory informs practice and practice informs theory®*

&

**ENVIRONMENTAL  
EDUCATION  
FOUNDATION**

Invite you to the:

Harvard School of Public Health Symposium:  
**THE IMPACT OF MOLD ON HUMAN HEALTH**

**June 7-8, 2004**

Harvard School of Public Health  
Kresge Building  
Snyder Auditorium  
Boston, Massachusetts

**An executive briefing that provides a scientific and balanced view of a controversial topic**

<http://www.hsph.harvard.edu/ccpe/programs/Mold.shtml>

Experts from science and industry will convene to discuss the available data and provide guidance to physicians and executives to make the best possible decisions for their patients, clients, and customers.

Join fellow EEF members and non-members representing scientists, physicians, lawyers, and executives from insurance companies, health care organizations, architectural and contracting firms, as well as university, government and public health leaders for a multi-disciplinary executive briefing that will prepare professionals to:

- Analyze the available animal and clinical data on the effects of mold on health
- Explore the biology of molds
- Assess the insurance liability and legal ramification of mold exposure
- Determine best practices for measuring mold exposure
- Identify strategies for prevention and remediation of mold in homes, offices, and schools.
- Qualify for entrance into the Environmental Education Foundation

For more information and registration for the Impact of Mold on Human Health, visit the following link:  
<http://www.hsph.harvard.edu/ccpe/programs/Mold.shtml>. When registering, please list **MOLD04-EEF** as your reference code or be sure to mention you are an EEF referred participant.
